CUSTOM TENDERS

Constellation Custom Tenders is proud to introduce a line of tenders designed and built for Mega Yachts. Working with world-class naval architects, we have developed a range of custom carbon composite tenders with options for power trains and lengths, in order to better meet the needs of today's mega-yachts.

The carbon-composite hulls are built by Americas Cup boat builders, using designs penned by Roger Martin and Rob Doyle. Blending high tech materials with classic design elements to produce a unique and sophisticated tender that runs and looks right.

RM 169R

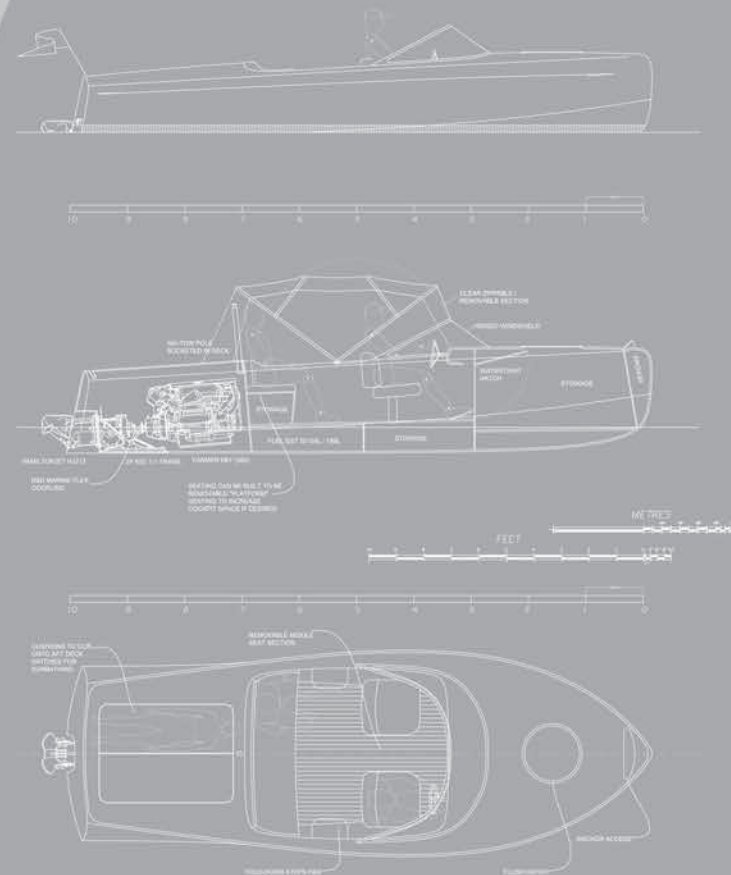

The RM 169R is the Quintessential retro styled runabout. With a lightweight carbon composite hull, and two options of drive system, it is fast and smart. Designed by Rodger Martin with a brief to create a look that matters. This boat would look good in a James Bond movie. Hull sizes for this model are available from 6 meters to 7.9 meters in order to match the dimensions of tender bays on both sail and power yachts. Hull #1 has currently under construction for a 60 meter Perini new build

General Specs

- Retro looking
- High tech composite construction
- Specifically designed to fit tender bays on Mega Yachts
- Owner limousine option
- Service / water sports option

Technical Specs

LOA	6M to 7.7M
Beam	2.3M
Draft	0.3M
Dead Rise	20 degrees
Displacement	1000Kg
Engine	Yanmar 6BY3 – 260 HP
Fuel	200 Liters
Cruise Speed	60 Kmph / 33 knots (estimated with full load)
Max Speed	80 Kmph / 38 knots (estimated with full load)

RM 169R

The RM 169U crew tender uses the RM 169 hull and is fitted to carry crew or serve as a utility and rescue boat. Designed to meet MCA approval, it utilizes functionality with aesthetics. Powered by a 260hp engine, this model can be configured as a crew utility and / or rescue boat. A towing package option is available. Hull #2 has been commisined for a 60 meter Perini new build.

RD121

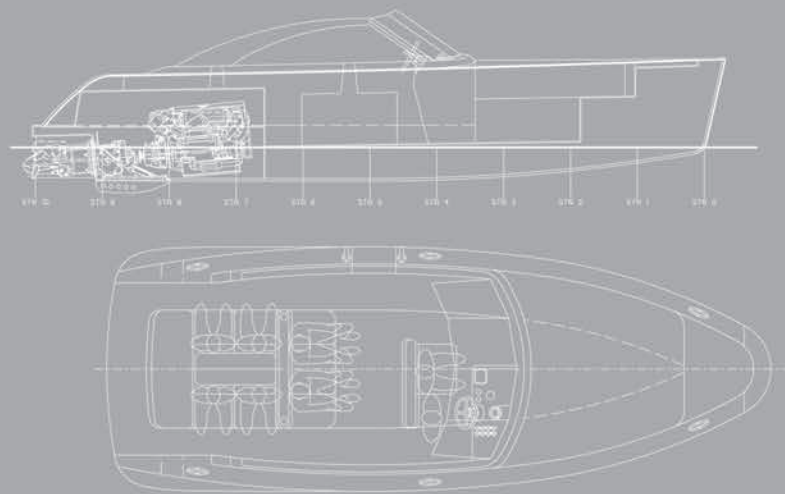

The RD 121 From the office of Rob Doyle, senior designer at Ron Holland Design for 15 years, this classic furthers our design philosophy of modernizing iconic looks. We don't want to reinvent the tender, only enhance it. With classic lines and a modern layout, this boat can be built at any length depending on your needs or tender bay size. Engine options include petrol, electric turbine or all electric and utilize carbon fiber inner and outer layers with closed cell foam core for low weight combined with strength and rigidity. Available with interior layout options, this tender can be configured for owner limousine services or crew utility. It also comes with windscreen and T-top options.

Technical Specs

LOA	7M / 22' 11" to 8.5m / 28'
Beam	2.6m / 8' 6"
Draft	0.34m / 1' 1"

 - No exposed propeller
 - Run up on beach option
 - Superb maneuverability
- Service / water sports option

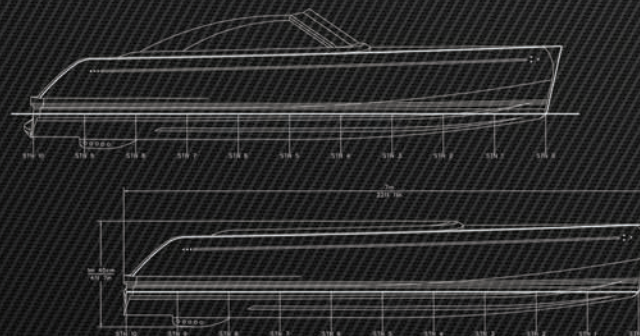

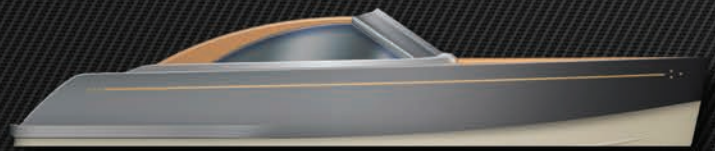

RD 121

Standard Features on all CCT Models

- Carbon fiber inner and outer layers with closed cell foam core, low weight with strength and rigidity

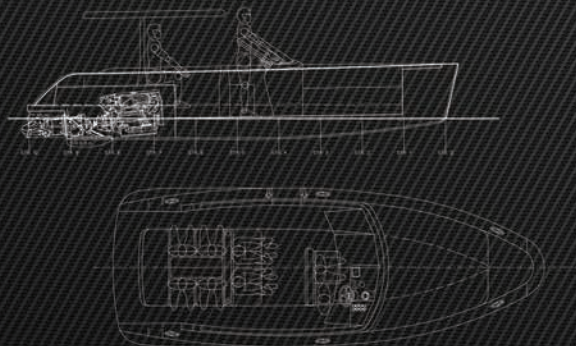

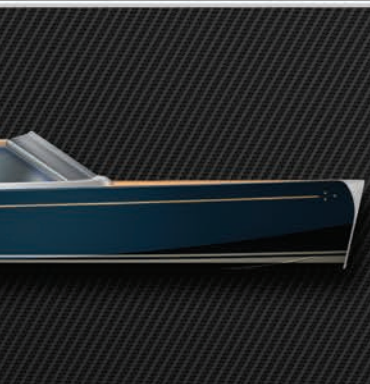

• Anchor locker	• Instant battery parallel
• Sealed cockpit hatches with hidden hinges and locks	• Hydraulic steering
• Custom windshield	• Bilge pump
• Self bailing cockpit	• Fuel pre filter system
• Heavy duty marine aluminium fuel tanks	• Engine sea strainer
• LED courtesy lights	• LED navigation lights flush mounted
• ABYC colour coded tinned wiring	• VHF with invisible antenna
• Isolated house and start batteries	• High quality upholstery

RD 121

Options

•GPS with invisible antenna	•Head	•Dodgers
•AIS with invisible antenna	•Fresh water shower	•T top (canvas or carbon fiber)
•Stereo	•Trim tabs	•Ski pole
•Battery charger	•Cooler	•Dive tank holders
•Underwater lights	•All electric propulsion	•Extra bolster seats
•Teak decks	•Turbine / electric propulsion	•MCA Rescue boat package
•Faux wood decks	•Boat covers	•Secure towing package
•Custom paint – clear coat carbon	•Sun pad	•Ladder
•Bow thruster	•Bimini	•Bolster Seat
